3CX

How It Works

3CX runs on your existing server and connects to any SIP phone (hardware or software) as well as iOS or Android devices as extensions. External lines are connected using VoIP Gateways (keep your PSTN lines) or with a VoIP provider.

3CX Makes Call Management a Breeze

3CX rids the PBX from the office and desktop environments, delivering Unified Communications features such as voice and video conferencing, seeing the presence of your colleagues, corporate instant messaging, setting your status and more. Users can avoid using a cryptic phone interface by managing their extension and their calls with just a few mouse clicks on Windows or directly from their iOS or Android device.

Extensive Enterprise Level Feature Set

While traditional PBXs require additional hardware modules and maintenance to add new features such as auto-attendant and call queuing, they all come standard with 3CX. Additionally, 3CX integrates with popular CRMs such as SalesForce, Google Contacts, Microsoft Dynamics, Office 365 and more.

Unparalleled Mobility – Take Your Extension Anywhere

3CX is unique in its integration of PUSH Technology which means that 3CX can ‘wake up’ the phone when a new VoIP call comes in! Now Android and iOS devices wake up when a call or chat message arrives, saving valuable battery time whilst still allowing you to be reachable on your extension anywhere and slashes company call costs as users can be reached via VoIP.

Bring your Business & Customers Closer with Integrated Web Conferencing

3CX’s easy to use integrated video conferencing solution, enables businesses to save time and money by hosting virtual meetings and webinars, while enjoying the benefits of face-to-face communication. Video conferences can be launched in a few mouse clicks, and participants can join from a web browser using Google’s cutting- edge WebRTC technology. WebRTC

Felipe Garcia, IT & America’s IT Director:

3CX is forward thinking, it developed a robust software PBX with hypervisor in mind and its communication solutions are a great fit for organizations of any size.
